We'll discuss , why one should choose us over others and how we are unique .

05

Future prospects →

Here, all our future endeavours will be mentioned , like how we will scale up and all its financial aspects.

06

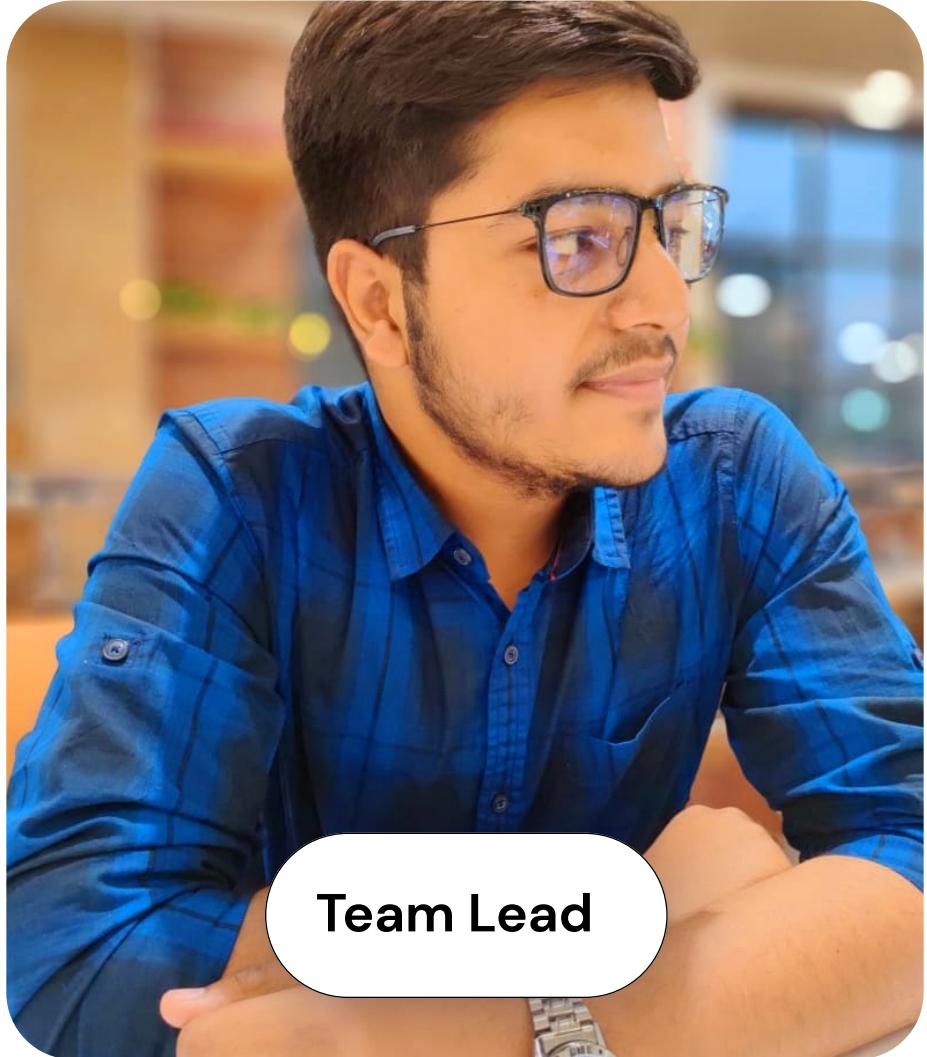

Thank you! →

A big thanking to the organisers of the event for providing us this opportunity.

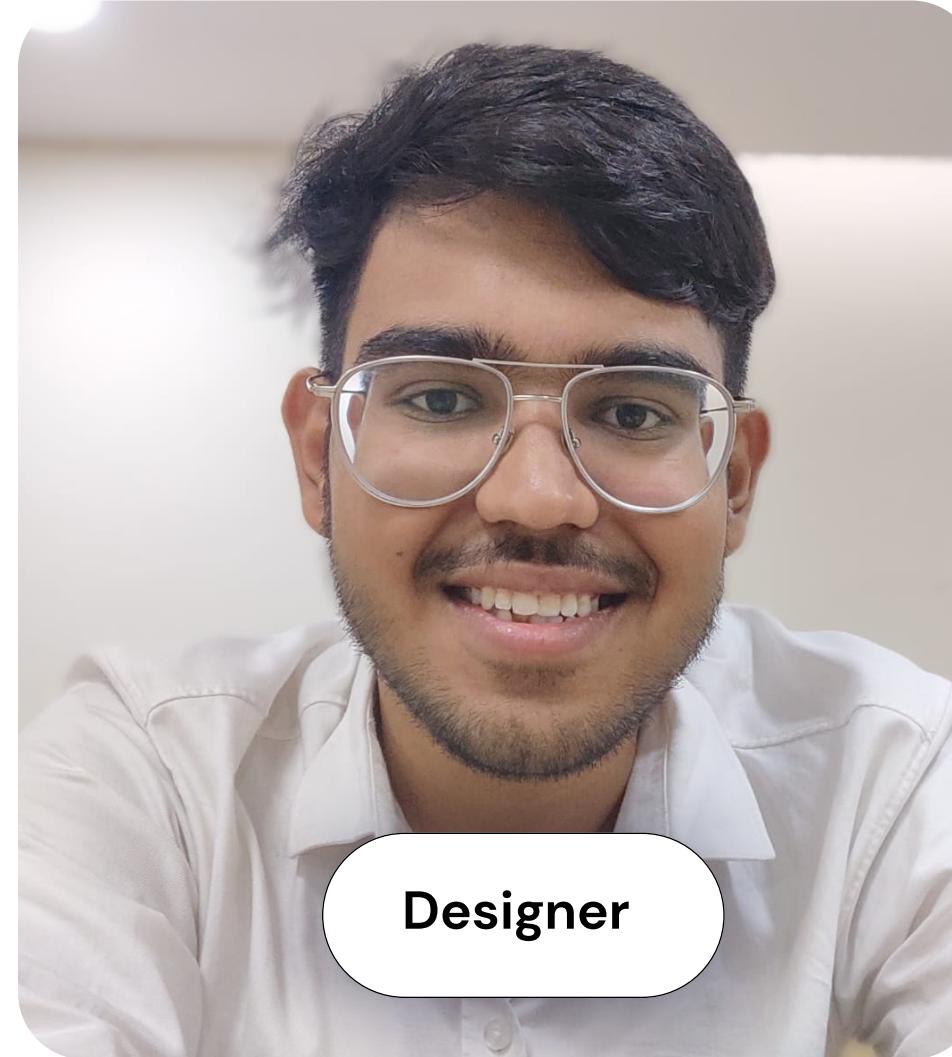

Our team

Team Lead

Yashu

He is the main person behind the team ,guiding the overall workflow of the project.

Designer

Anurag

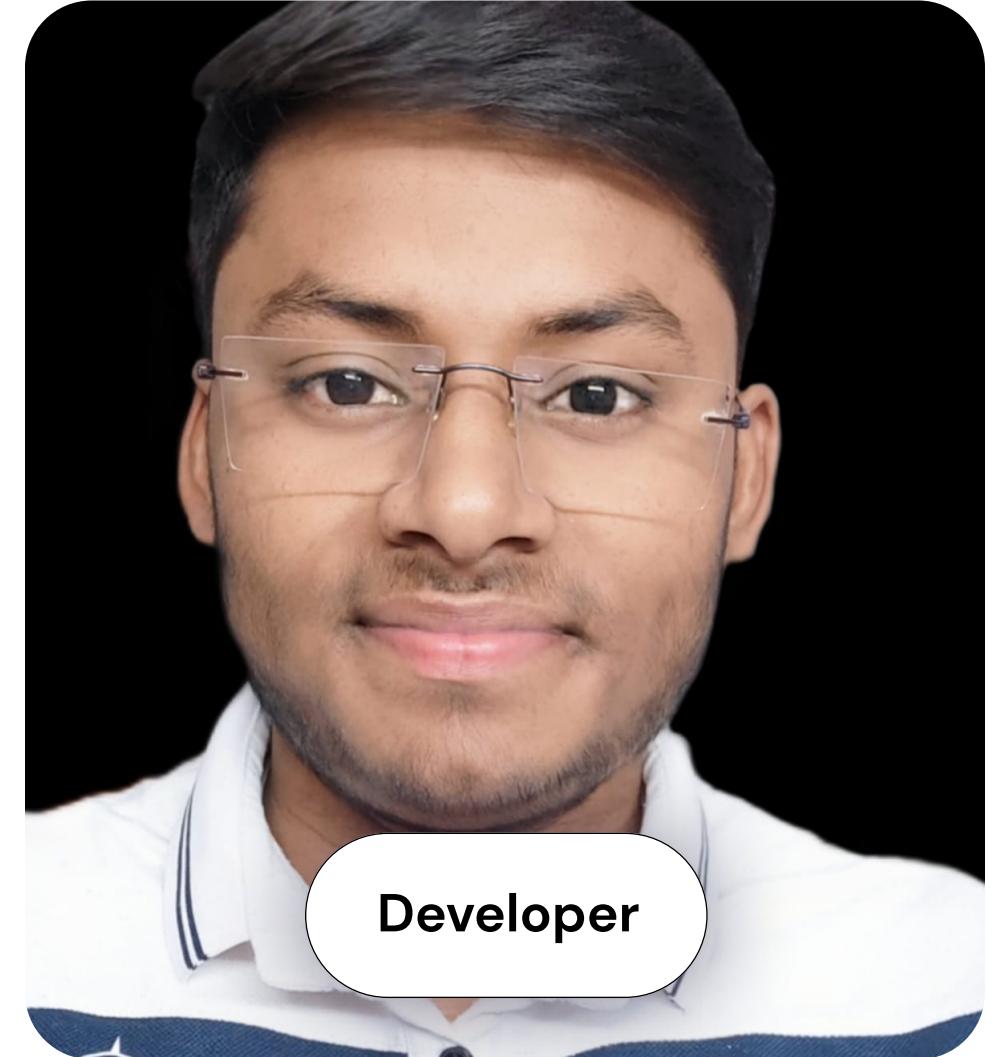

Our main designer , he uses his powerful imaginative skills to bring out the best of the project that is soothing to the eyes of users.

Developer

Shiven

The guy behind all the backend development of our web application, his intensive knowledge on web technology like node, mongodb has made our web infrastructure really great.

Developer

Vikas

He is our frontend development guy, who puts the imaginative skills of our designer into actions, he has mastery in technologies like react.js etc.

Our Motive

Problems :

As students, we faced issues of finding best hostel accommodations as per our need and budget and due to lack of knowledge about locality, rent etc ,so we had to settle with average hostels with high price . Same is the case with a lot of students and office workers who have to frequently move to new places for study and work.

Locale Unawareness

when new to a city, we have zero knowledge about all the areas and accomodations and tend to lose a good deal.

Visiting Hassle

To find the best hostel as per ones' need , they have to visit multiple hostels/pg to get the details which is very tiresome work.

Deception

Many a times owners put out fake images, descriptionsand reviews to attract tenants and they get scammed.

Peer Unavailability

We are unable to find where our college/office peers reside, as we want to have their company.

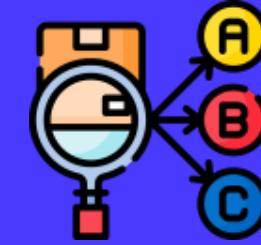

Solutions

We are providing a one stop solution for hassle-free searching and booking of various hostel and pg as accommodations through our web application.

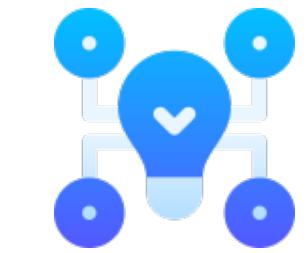

Physical Verification

We will conduct offline surveys through which we'll be maintaining a datasets of hostels nearby and their rents accordingly. Also this makes sure there are genuine details and reviews of hostel.

Peer Percentage

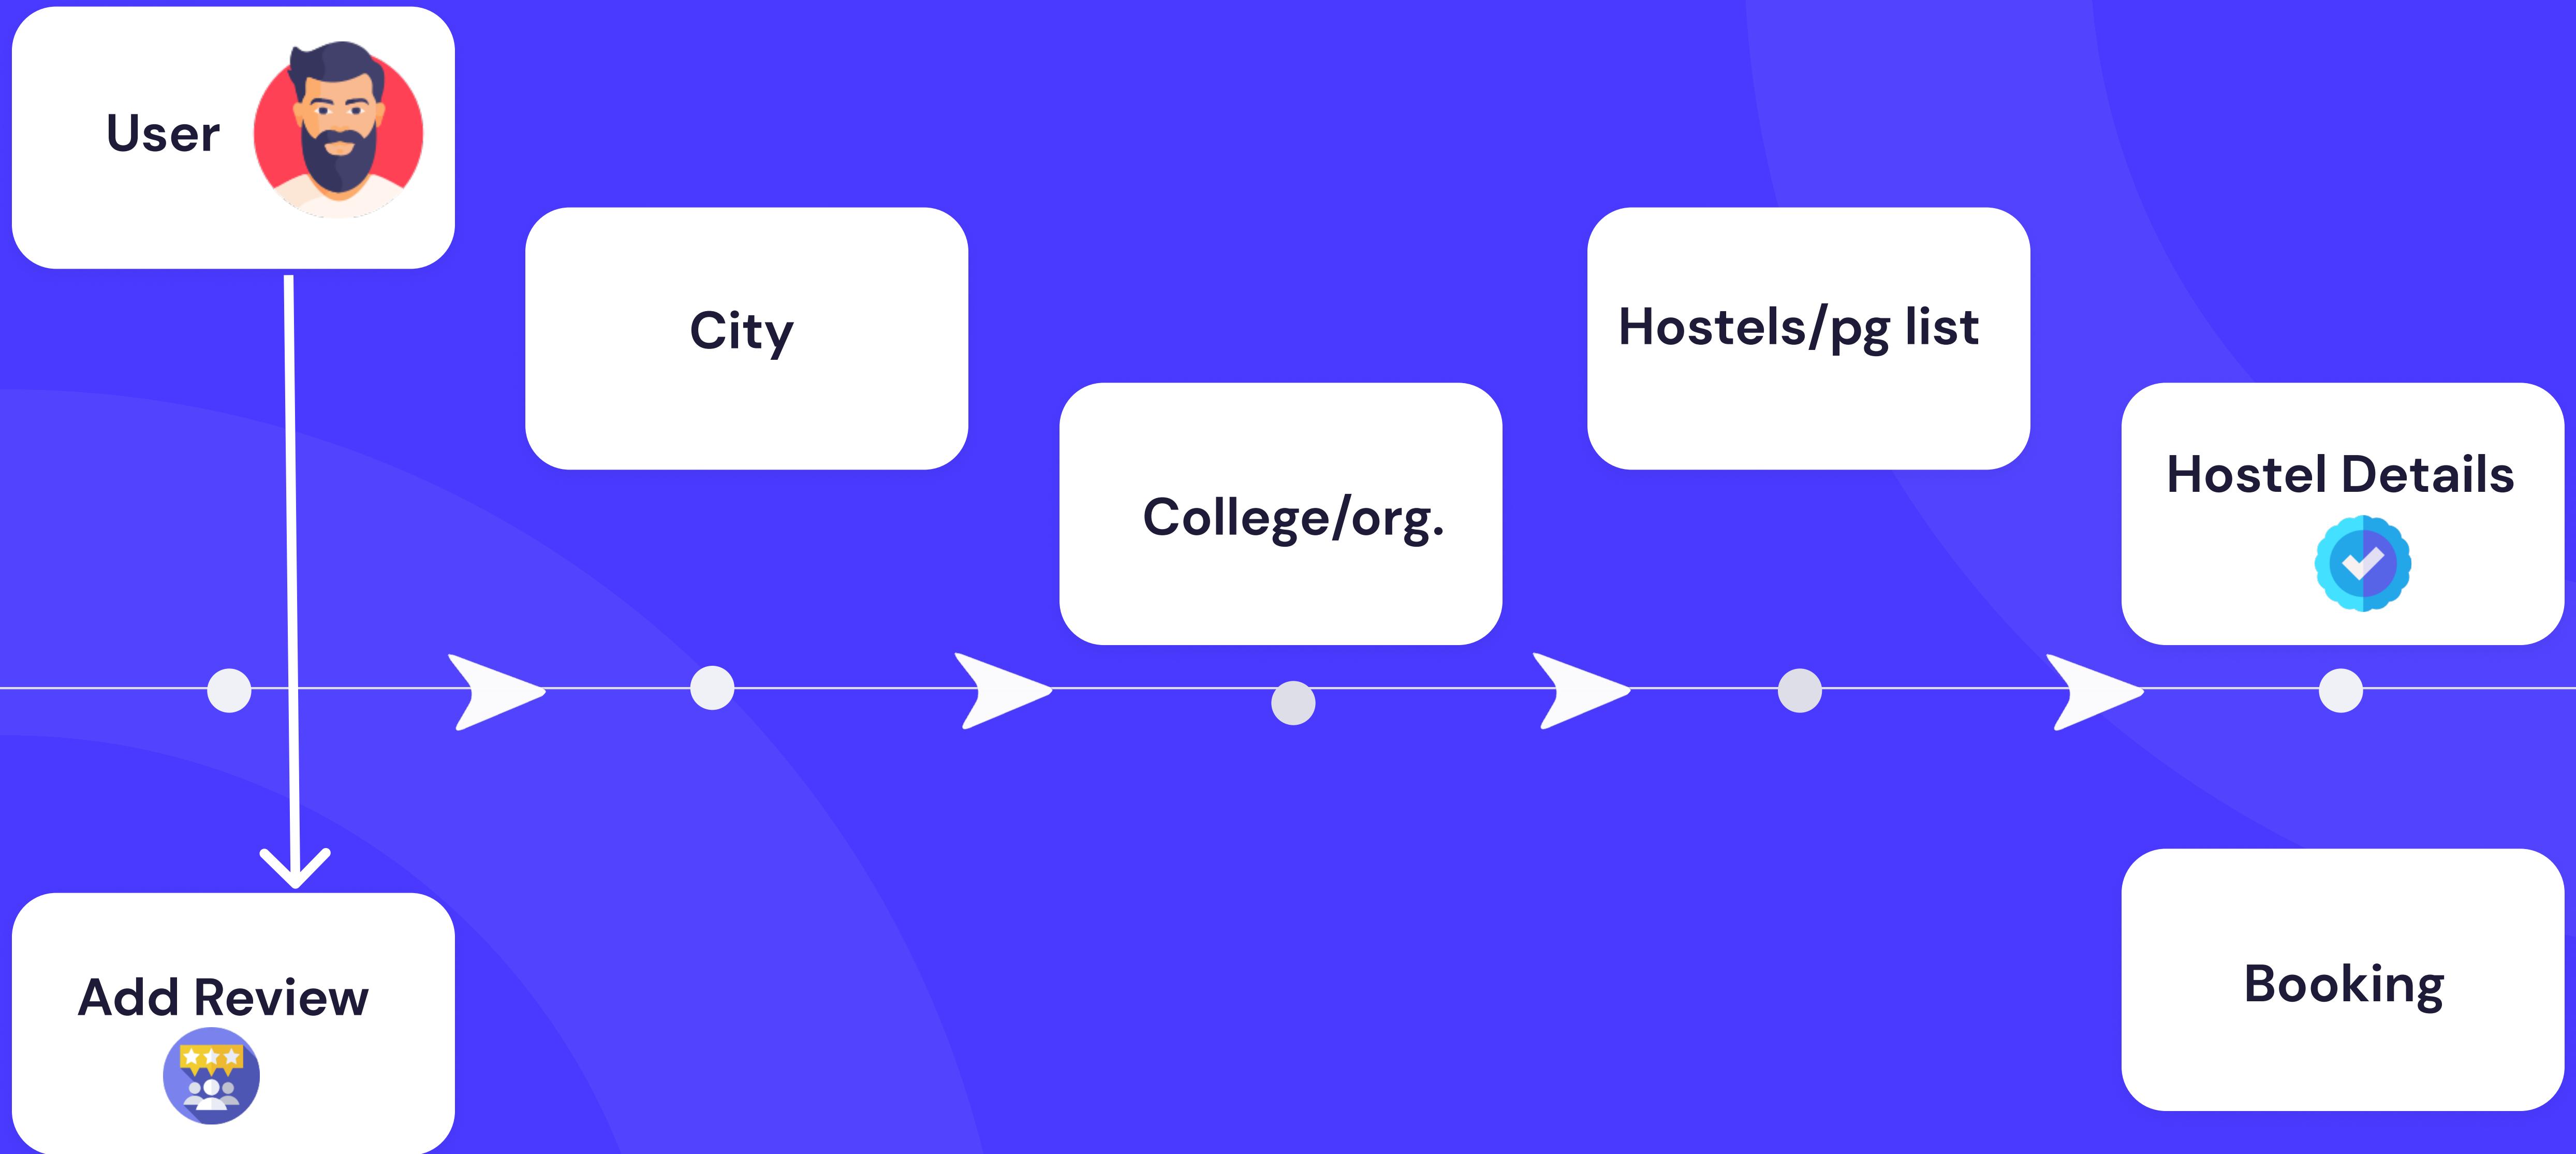

We will have datasets through which you can find out if and where your colleague resides will therefore help in hangouts and other fun activities

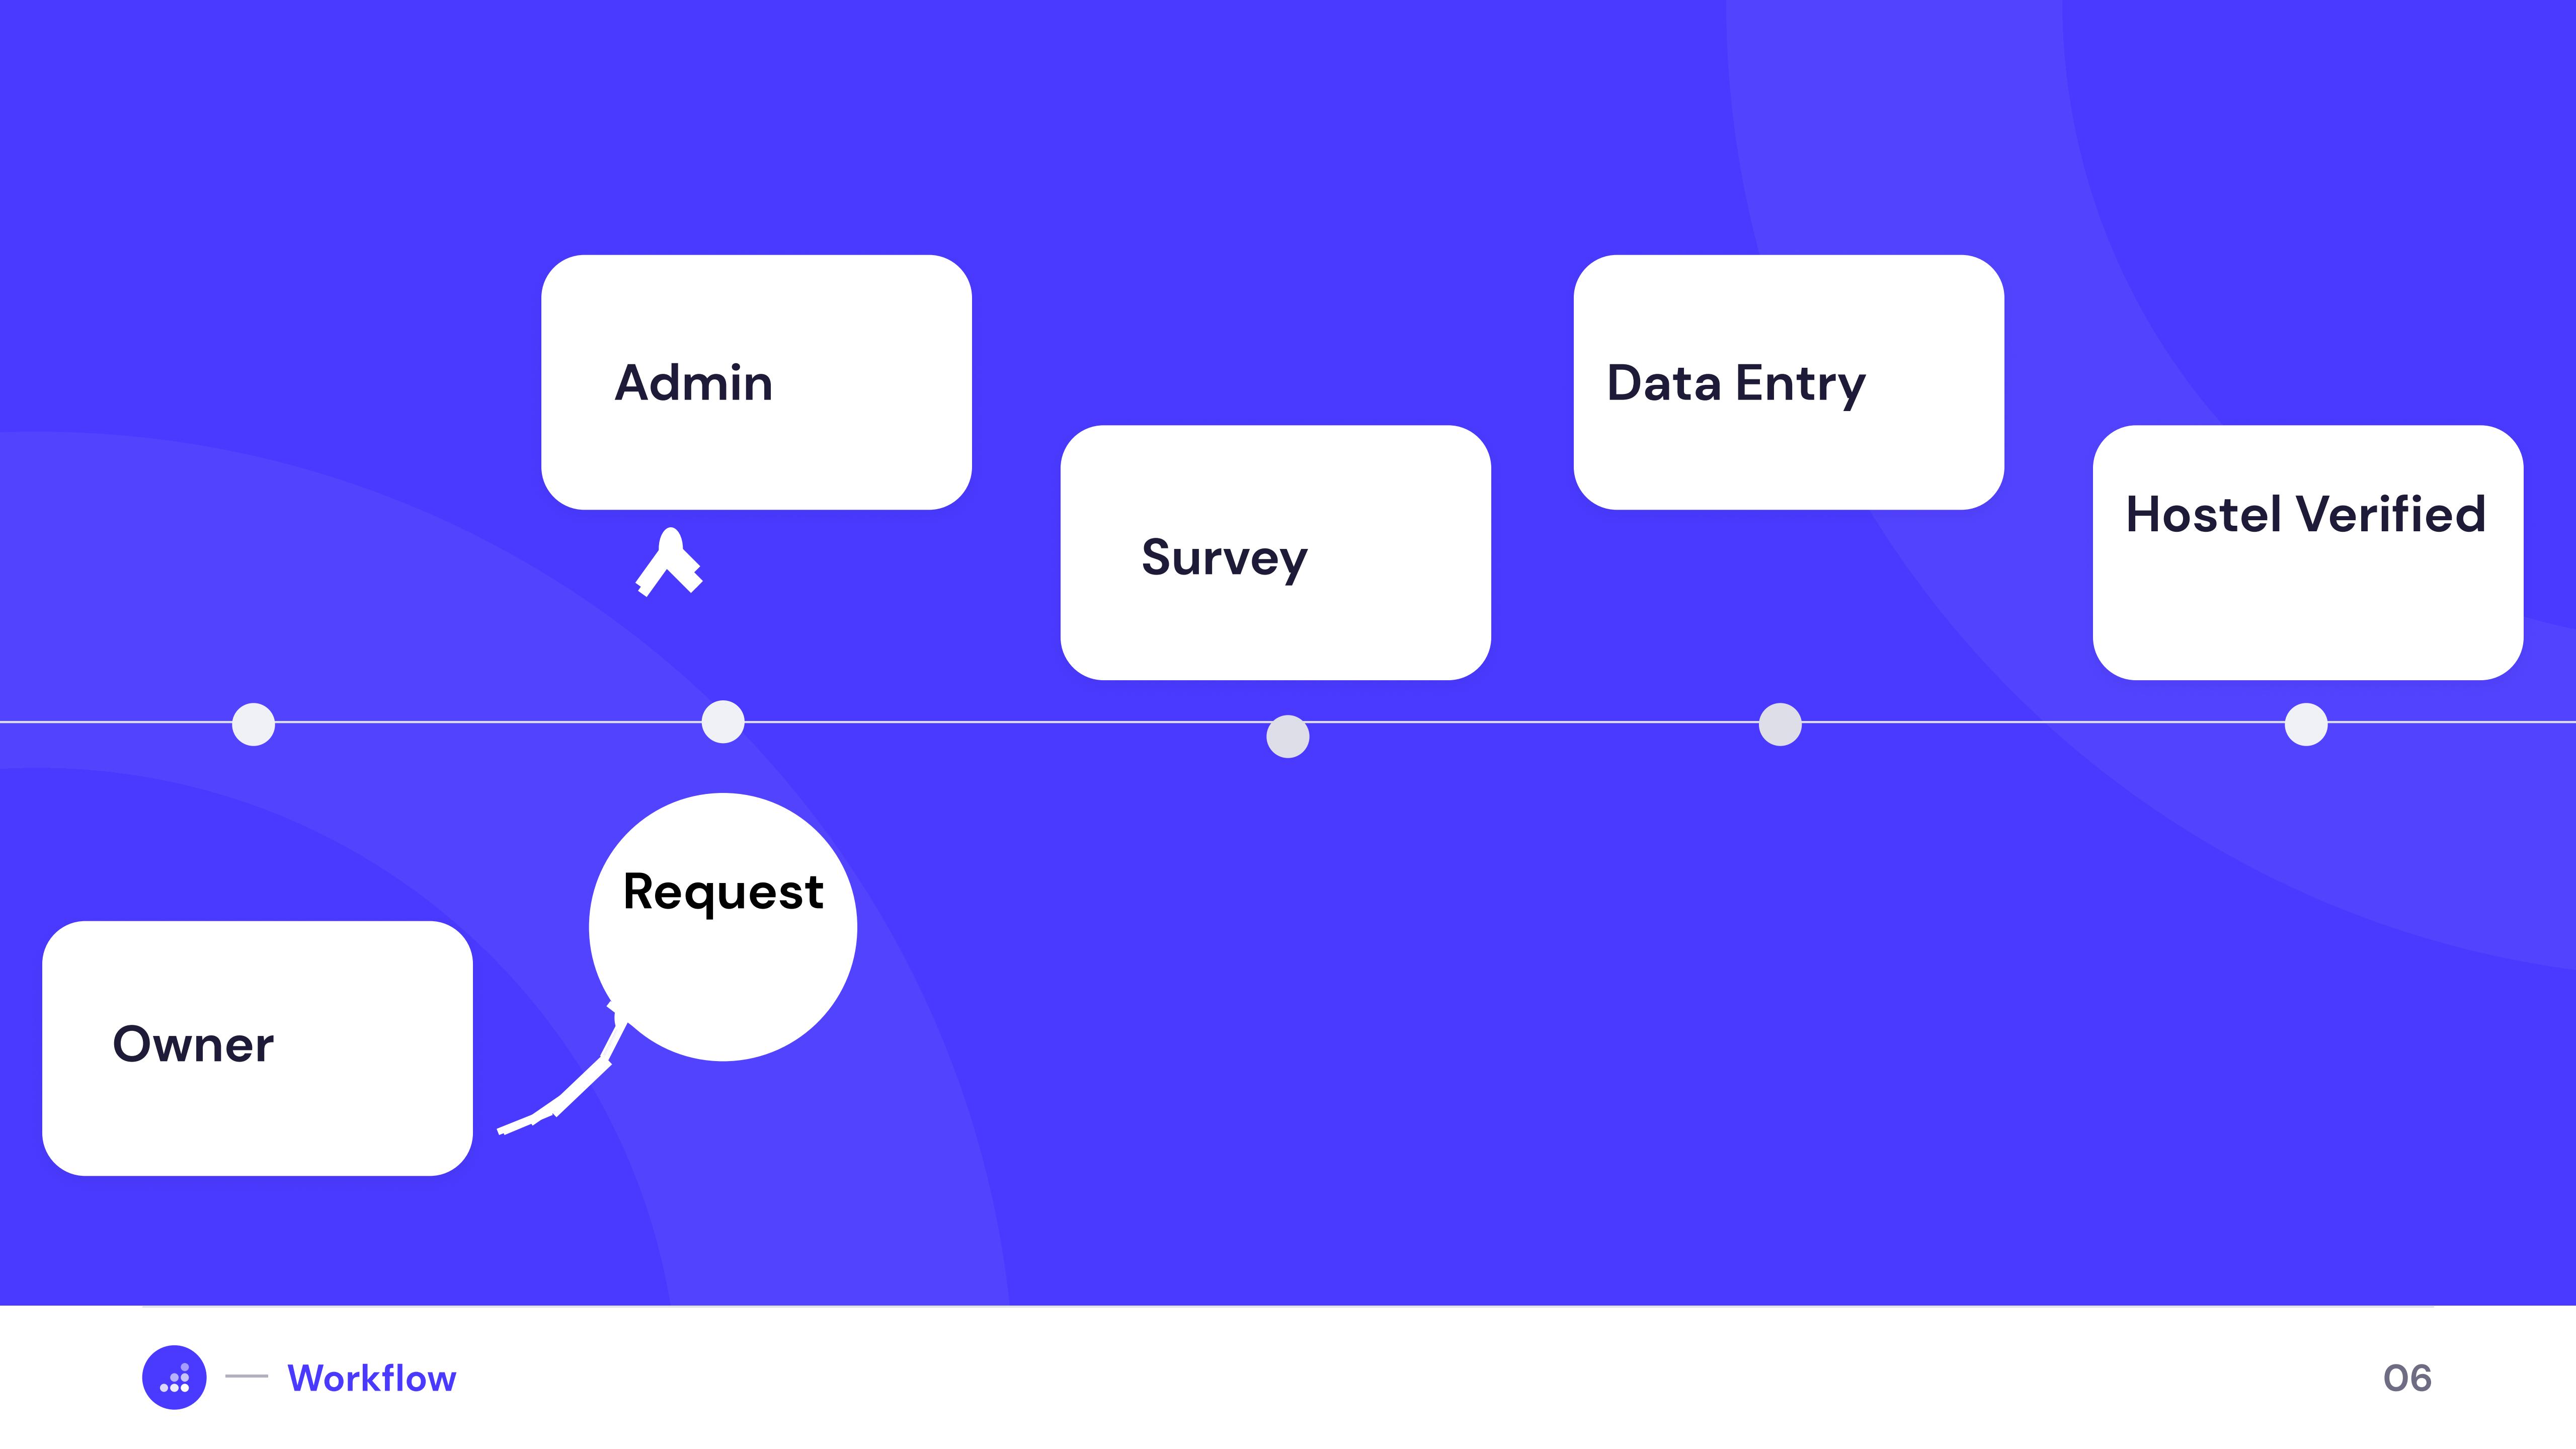

One Stop Solution

Our service will be a one stop solution for finding and booking hostels/pg as per requirement and it removes the tedious work of visiting every hostel physically to get details or book it.
